

AAA Driver Improvement courses for mature drivers are available from AAA. Ask your local club about the *Safe Driving for Mature Operators* and the *Online Mature Driver Safety Course*.

In many states, the law requires your insurance company to give you a discount if you complete a mature driver improvement course. AAA offers two options to take this course either in a classroom setting or online, at any location with Internet connectivity.

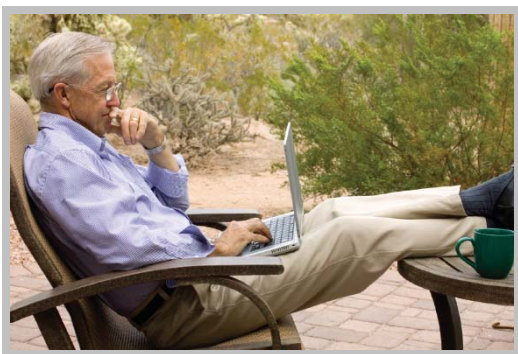

Upon completion of either course, you will receive a certificate of completion which may qualify you for an auto insurance rate discount. Please check with your auto insurance provider for details on discounts and eligibility prior to taking the classroom or online course.

Safe Driving for Mature Operators

This course was created specifically for drivers 55 and older. The classroom-based course is designed to deliver tips and techniques to help experienced drivers compensate for changing vision, reflexes and response time; understand how prescription medications may affect driving; and how to drive defensively in a variety of situations.

Online Mature Driver Safety Course

This AAA-approved online driver safety course geared to mature drivers helps participants fine-tune driving skills and knowledge of traffic laws while learning about age-related physical changes and how to adjust driving practices to reduce chances for traffic violations, crashes and injury.

The online course is designed for users to go at their own pace and according to their own schedule. You can stop at any time and your progress will be saved.

It is divided into six units of instruction that target the specific needs of seasoned drivers.
